

2008 WA Significant Geospatial Data Sets

2009 Inventory - Washington State Agencies Significant Geo-datasets (as defined in ISB GIT Standards)											
				Last Updated: Jan. 5, 2011 (Web Links Added and UGA listing)							
Agency		Data Title		Data Description			Data Availability			Links	
							Public	Agency Shared	Restricted	Metadata	View
Utilities & Transportation (UTC) - 2009											
1		1	Petroleum Pipelines	Vector centerlines showing the locations of hazardous liquid pipelines, interstate natural gas pipelines, natural gas transmission pipelines, and natural gas pipelines operating over 250 psig. within Washington State.					x	Metadata	View
2			2	Solid Waste Collection Company Certificate Boundaries	Boundaries of the Commission-issued Certificates of Public Convenience and Necessity for solid waste collection companies.			x			Metadata View
3			3	Solid Waste Collection Company Service Areas	Areas inside of the solid waste certificates of Public Convenience and Necessity that the company actually serves. These are defined by the company's tariff, on file with the Commission.						Metadata View
			4	Telecommunication Exchange Boundaries	This dataset contains polygon boundaries for exchange or "wire centers." These boundaries were digitized from Commission filings.					x	Metadata View
Recreation & Conservation Office (RCO) - 2009											
4			1	Motorized Boat Launches of Washington State	This dataset contains geographic point data for motorized boat launches found to be open to the public in Washington State at the time of the field inventory (1997). This information is based on a comprehensive field inventory of motorized boat launches conducted by the Washington State Interagency Recreation and Conservation Office in 1997. The dataset contains geographic and descriptive information for 894 boat launches around the state.			x			Metadata View
4			2	Moorage Facilities of Washington State	This dataset contains geographic point data for large boat moorage facilities determined to be open to the public in Washington State. This information is based on a comprehensive field inventory of large boat facilities conducted by the Washington State Recreation and Conservation Office in 2000. The dataset contains geographic and descriptive information for 344 moorage facilities around the state.			x			Metadata View
5			3	RCO Grant Projects	This dataset contains geographic point data for all projects funded through Washington State Recreation and Conservation Office (RCO), including recreation, conservation, and salmon related projects. Project data is maintained in PRISM (RCO's PProject Information System), which contains geographic and descriptive information for thousands of recreation and habitat projects around the state.			x			Metadata View

2008 WA Significant Geospatial Data Sets

Office of Financial Management (OFM) - 2009				<i>**All of the data sets listed are extracts from the 2000 Tiger/Line files from the US Bureau of the census. This includes files, which are dated 1990: this is an</i>					
6		1	American Indian Areas	Population and housing estimates, 2000-present (derived from the most recent TIGER/Line files, NOT wholly consistent with 2000 Census data).	x			Metadata	View
7		2	Census Block Groups	Population and housing estimates, 2000-present (derived from the most recent TIGER/Line files, consistent with 2000 Census data).	x			Metadata	View
8		3	Census Designated Places	Population and housing estimates, 2000-present (derived from the most recent TIGER/Line files, consistent with 2000 Census data).	x			Metadata	View
9		4	Census Tracts	Population and housing estimates, 2000-present (derived from the most recent TIGER/Line files, consistent with 2000 Census data).	x			Metadata	View
10		5	Public Use Microdata Areas - 1%	Population and housing estimates, 2000-present (derived from the most recent TIGER/Line files, consistent with 2000 Census data).	x			Metadata	View
11		6	Public Use Microdata Areas - 5%	Population and housing estimates, 2000-present (derived from the most recent TIGER/Line files, consistent with 2000 Census data).	x			Metadata	View
12		7	School Districts	Population and housing estimates, 2000-present (derived from the most recent TIGER/Line files, consistent with 2000 Census data).	x			Metadata	View
13		8	School Districts [County Parts]	Population and housing estimates, 2000-present (derived from the most recent TIGER/Line files, consistent with 2000 Census data).	x			Metadata	View
14		9	State Legislative Districts	Population and housing estimates, 2000-present (derived from the most recent TIGER/Line files, consistent with 2000 Census data).	x			Metadata	View
15		10	State Legislative Districts [County Parts]	Population and housing estimates, 2000-present (derived from the most recent TIGER/Line files, consistent with 2000 Census data).	x			Metadata	View
16		11	Urban Areas	Population and housing estimates, 2000-present (derived from the most recent TIGER/Line files, consistent with 2000 Census data).	x			Metadata	View
17		12	Urban Areas [County Parts]	Population and housing estimates, 2000-present (derived from the most recent TIGER/Line files, consistent with 2000 Census data).	x			Metadata	View
18		13	ZIP Code Tabulation Areas, 5-Digit	Population and housing estimates, 2000-present (derived from the most recent TIGER/Line files, consistent with 2000 Census data).	x			Metadata	View
19		14	ZIP Code Tabulation Areas, 5-Digit [County Parts]	Population and housing estimates, 2000-present (derived from the most recent TIGER/Line files, consistent with 2000 Census data).	x			Metadata	View
20		15	American Indian Areas	TIGER 20XX layer (derived from the most recent TIGER/Line files, NOT wholly consistent with 2000 Census data).	x			Metadata	View
21		16	Census Blocks	TIGER 20XX layer (derived from the most recent TIGER/Line files, consistent with 2000 Census data).	x			Metadata	View
22		17	Census Block Groups	TIGER 20XX layer (derived from the most recent TIGER/Line files, consistent with 2000 Census data).	x			Metadata	View
23		18	Census Designated Places	TIGER 20XX layer (derived from the most recent TIGER/Line files, consistent with 2000 Census data).	x			Metadata	View
24		19	Census Tracts	TIGER 20XX layer (derived from the most recent TIGER/Line files, consistent with 2000 Census data).	x			Metadata	View
25		20	Combined Statistical Areas	TIGER 20XX layer (derived from the most recent TIGER/Line files, consistent with 2000 Census data).	x			Metadata	View
26		21	Core-Based Statistical Areas	TIGER 20XX layer (derived from the most recent TIGER/Line files, consistent with 2000 Census data).	x			Metadata	View
27		22	Counties	TIGER 20XX layer (derived from the most recent TIGER/Line files, consistent with 2000 Census data).	x			Metadata	View

2008 WA Significant Geospatial Data Sets

28		23	Incorporated Places	TIGER 20XX layer (derived from the most recent TIGER/Line files, consistent with 2000 Census data).	x			Metadata	View
29		24	Incorporated Places [County Parts]	TIGER 20XX layer (derived from the most recent TIGER/Line files, consistent with 2000 Census data).	x			Metadata	View
30		25	Legislative Districts	TIGER 20XX layer (derived from the most recent TIGER/Line files, consistent with 2000 Census data).	x			Metadata	View
31		26	Legislative Districts [County Parts]	TIGER 20XX layer (derived from the most recent TIGER/Line files, consistent with 2000 Census data).	x			Metadata	View
32		27	Metropolitan Divisions	TIGER 20XX layer (derived from the most recent TIGER/Line files, consistent with 2000 Census data).	x			Metadata	View
33		28	Metropolitan Statistical Areas	TIGER 20XX layer (derived from the most recent TIGER/Line files, consistent with 2000 Census data).	x			Metadata	View
34		29	Public Use Microdata Areas - 1%	TIGER 20XX layer (derived from the most recent TIGER/Line files, consistent with 2000 Census data).	x			Metadata	View
35		30	Public Use Microdata Areas - 5%	TIGER 20XX layer (derived from the most recent TIGER/Line files, consistent with 2000 Census data).	x			Metadata	View
36		31	Roads	TIGER 20XX layer (derived from the most recent TIGER/Line files, NOT consistent with 2000 Census data).	x			Metadata	View
37		32	School Districts	TIGER 20XX layer (derived from the most recent TIGER/Line files, consistent with 2000 Census data).	x			Metadata	View
38		33	School Districts [County Parts]	TIGER 20XX layer (derived from the most recent TIGER/Line files, consistent with 2000 Census data).	x			Metadata	View
39		34	Traffic Analysis Zones	TIGER 20XX layer (derived from the most recent TIGER/Line files, consistent with 2000 Census data).	x			Metadata	View
40		35	Urban Areas	TIGER 20XX layer (derived from the most recent TIGER/Line files, consistent with 2000 Census data).	x			Metadata	View
41		36	Urban Areas [County Parts]	TIGER 20XX layer (derived from the most recent TIGER/Line files, consistent with 2000 Census data).	x			Metadata	View
42		37	Water Features	TIGER 20XX layer (derived from the most recent TIGER/Line files, NOT consistent with 2000 Census data).	x			Metadata	View
43		38	ZIP Code Tabulation Areas, 5-digit	TIGER 20XX layer (derived from the most recent TIGER/Line files, consistent with 2000 Census data).	x			Metadata	View
44		39	ZIP Code Tabulation Areas, 5-digit [County Parts]	TIGER 20XX layer (derived from the most recent TIGER/Line files, consistent with 2000 Census data).	x			Metadata	View
45		40	American Indian Areas	Census 2000 layer (features derived from 2000 UA TIGER/Line files, consistent with 2000 Census data).	x			Metadata	View
46		41	Census Blocks	Census 2000 layer (features derived from 2000 UA TIGER/Line files, consistent with 2000 Census data).	x			Metadata	View
47		42	Census Block Groups	Census 2000 layer (features derived from 2000 UA TIGER/Line files, consistent with 2000 Census data).	x			Metadata	View
48		43	Census County Divisions	Census 2000 layer (features derived from 2000 UA TIGER/Line files, consistent with 2000 Census data).	x			Metadata	View
49		44	Census Designated Places	Census 2000 layer (features derived from 2000 UA TIGER/Line files, consistent with 2000 Census data).	x			Metadata	View
50		45	Census Tracts	Census 2000 layer (features derived from 2000 UA TIGER/Line files, consistent with 2000 Census data).	x			Metadata	View
51		46	Congressional Districts	Census 2000 layer (features derived from 2000 UA TIGER/Line files, consistent with 2000 Census data).	x			Metadata	View

2008 WA Significant Geospatial Data Sets

52		47	Counties	Census 2000 layer (features derived from 2000 UA TIGER/Line files, consistent with 2000 Census data).	x			Metadata	View
53		48	Incorporated Places	Census 2000 layer (features derived from 2000 UA TIGER/Line files, consistent with 2000 Census data).	x			Metadata	View
54		49	Legislative Districts	Census 2000 layer (features derived from 2000 UA TIGER/Line files, consistent with 2000 Census data).	x			Metadata	View
55		50	Public Use Microdata Areas - 1%	Census 2000 layer (features derived from 2000 UA TIGER/Line files, consistent with 2000 Census data).	x			Metadata	View
56		51	Public Use Microdata Areas- 5%	Census 2000 layer (features derived from 2000 UA TIGER/Line files, consistent with 2000 Census data).	x			Metadata	View
57		52	School Districts	Census 2000 layer (features derived from 2000 UA TIGER/Line files, consistent with 2000 Census data).	x			Metadata	View
58		53	Tribal Designated Statistical Area	Census 2000 layer (features derived from 2000 UA TIGER/Line files, consistent with 2000 Census data).	x			Metadata	View
59		54	Urban Areas	Census 2000 layer (features derived from 2000 UA TIGER/Line files, consistent with 2000 Census data).	x			Metadata	View
60		55	Water Features	Census 2000 layer (features derived from 2000 UA TIGER/Line files, consistent with 2000 Census data).	x			Metadata	View
61		56	American Indian Areas	Census 1990 layer (features derived from 2000 UA TIGER/Line files, consistent with 1990 Census data).	x			Metadata	View
62		57	Census Blocks	Census 1990 layer (features derived from 2000 UA TIGER/Line files, consistent with 1990 Census data).	x			Metadata	View
63		58	Census Block Groups	Census 1990 layer (features derived from 2000 UA TIGER/Line files, consistent with 1990 Census data).	x			Metadata	View
64		59	Census County Divisions	Census 1990 layer (features derived from 2000 UA TIGER/Line files, consistent with 1990 Census data).	x			Metadata	View
65		60	Census Designated Places	Census 1990 layer (features derived from 2000 UA TIGER/Line files, consistent with 1990 Census data).	x			Metadata	View
66		61	Census Tracts	Census 1990 layer (features derived from 2000 UA TIGER/Line files, consistent with 1990 Census data).	x			Metadata	View
67		62	Counties	Census 1990 layer (features derived from 2000 UA TIGER/Line files, consistent with 1990 Census data).	x			Metadata	View
68		63	Incorporated Places	Census 1990 layer (features derived from 2000 UA TIGER/Line files, consistent with 1990 Census data).	Yes			Metadata	View
Dept. of Health (DOH) - 2009									
69		1	Hospitals	Point locations of all hospitals, including critical access, acute care and military.	x			Metadata	View
70		2	Community and Migrant Health Centers	Point locations of the Federal and State funded health centers.	x			Metadata	View
71		3	Local Health Jurisdictions	Boundaries and office locations for the 35 LHJ's.	x			Metadata	View
72		4	Nursing Homes	Point locations of adult care facilities.	x			Metadata	View
69		5	Pharmacies	Point locations for retail and manufacturing including licensing information.	x			Metadata	View
70		6	Health Clinics	Point locations for each primary care, rural and tribal clinic.	x			Metadata	View
71		7	Healthcare Shortage Areas	Boundaries of provider shortage areas for primary, dental and mental care.	x			Metadata	View
72		8	Group A Wells	Public water sources serving more than 15 connections.	x			Metadata	View
73		9	Group B Wells	Public water sources serving fewer than 15 connections and 25 people per day.	x			Metadata	View
74		10	Trauma Response Areas	Emergency Medical & Trauma response boundaries.	x			Metadata	View
75		11	EMS Stations	EMS vehicles and stations depicted as points, including the level of life support.	x			Metadata	View

2008 WA Significant Geospatial Data Sets

76		12	Wellhead Protection Areas	Boundaries of the "time of travel" for contamination potential around public wells, 6 month, 1, 5 and 10 year intervals.	x			Metadata	View
77		13	Water Systems	Boundaries of public water systems.	x			Metadata	View
78		14	Biotoxin Closure Zones	Boundaries of closure zones for Paralytic Shellfish Poisoning (PSP) in shellfish.	x			Metadata	View
79		15	Commercial Shellfish Harvest Sites	Point locations of certified commercial shellfish harvesting sites.	x			Metadata	View
80		16	Pollution Closures	Permanent closure area boundaries for shellfish harvesting including marinas, wastewater treatment facilities and urban areas.	x			Metadata	View
81		17	Recreational Beaches	Shoreline segments indicating public beaches that are accessible for shellfish harvesting.	x			Metadata	View
82		18	Marine Water Stations	Point locations of water quality monitoring stations for fecal coliform bacteria.	x			Metadata	View

2008 WA Significant Geospatial Data Sets

Dept of Transportation (WSDOT) - 2009									
83		1	09-11 Programmed Transportation Projects (All phases and funding), Washington State Department of Transportation	Points and lines depict the locations of projects in the Washington State Department of Transportation's Capital Improvement and Preservation Program (CIPP) Operating Book database.	x	x		Metadata	View
84		2	Aggregate Sources used by the Washington State Department of Transportation	Points depict aggregate sources (PitSites 7,400+) that have been used for WSDOT construction purposes. Please note: This data set updates daily.		x		Metadata	View
85		3	CAD data, Washington State Department of Transportation Photogrammetry - with Index	WSDOT planimetric data, highly accurate transportation design base maps, are available in Microstation .DGN format for Departmental use with WSDOT's other corporate geospatial data. An associated ESRI index is included to ease the data discovery process. Here polygons show the geographic extent of available planimetric data. Also provided are invoice numbers that tie into the CAD and Orthophoto Information System (COPIS) application.		x		Metadata	View
86		4	Chronic Environmental Deficiencies, Washington State Department of Transportation	This feature class contains points indicating the location of chronic environmental deficiencies along state routes.		x		Metadata	View
87		5	City Limits of Washington State	Polygons depict the boundaries of Washington State's incorporated municipalities, as recorded by the Washington State Office of Financial Management. Attributes include city names as provided by the Washington State Office of Financial Management.	x	x		Metadata	View
88		6	Collisions, Washington State Department of Transportation Transportation Data Office	This specialized query, from the Transportation Data Office Collision Data Mart, represents collisions that have occurred on State Routes in Washington state; including the collision-level factors that were present at the time of the collision.		x		Metadata	View
89		7	Control Sections, Washington State Department of Transportation, Transportation Data Office	This data grouping is relative to control section information which in turn is used for calculating sales tax due to the contractor for services and work performed within the specific control section.		x		Metadata	View
90		8	Counties of Washington State	The counties of Washington state are depicted as polygons.	x	x		Metadata	View
91		9	Dynamap Transportation, by TeleAtlas.	Dynamap/Transportation is a vector based, digital, geographic database in which streets and features are represented as line segments, polygons or points. The product is designed specifically with enhanced routing functionality.			x	Metadata	View
92		10	Ferry Routes of Washington State	Routes of vessels providing scheduled, public car ferry service in the waters of Washington State are depicted as linear features.				Metadata	View
93		11	Ferry Terminals of Washington State, Public and Private	This data depicts the locations of ferry terminals in Washington State. Please note that this dataset is separate from the GIS Road Log Ferry Terminals GIS dataset, which shows only ferry terminals that are directly adjacent to a Washington State Route.	x	x		Metadata	View
94		12	FGTS - Washington State Freight and Goods Transportation System, State Highways	Lines depict Washington State Highways that are part of the Freight and Goods Transportation System. The Freight and Goods Transportation System is an inventory of the tonnages of freight moving along the highways, streets and roads of Washington.	x	x		Metadata	View

2008 WA Significant Geospatial Data Sets

95		13	Flow Exempt Lakes of Washington, Herrera Environmental Consultants, Northwest Hydraulic Consultants	Lakes and waterbodies in Washington that may be exempt from stormwater flow controls. Data set does not include a spatial representation of the Puget Sound or the Pacific Ocean but these water bodies are exempt.	x	x		Metadata	View
96		14	Flow Exempt Streams of Washington, Herrera Environmental Consultants, Northwest Hydraulic Consultants	Streams in Washington that may be exempted from stormwater flow controls. These streams have a drainage area of at least 100-105 square miles.	x	x		Metadata	View
97		15	Graticule, at 30 Minute Interval	The data set consists of lines of longitude and latitude covering the State of Washington, at increments of thirty minutes.	x	x		Metadata	View
98		16	Highway Urban and Urbanized Areas of Washington State	Highway Urban Areas, as defined by the Federal Highway Administration, are depicted as polygons.	x	x		Metadata	View
99		17	HSS - Washington Highways of Statewide Significance, at 1:24,000	Lines represent Washington State's Highways of Statewide Significance. Highways of Statewide Significance include interstate highways and other principal arterials that are needed to connect major communities in the state.	x	x		Metadata	View
100		18	Indian Reservations of Washington State	Boundaries of Indian Reservations recognized by the U.S. Bureau of Indian Affairs.	x	x		Metadata	View
101		19	Maintenance Areas of the Washington State Department of Transportation, at 1:500,000	Regional Maintenance Area boundaries of the Washington State Department of Transportation are depicted as polygons.	x	x		Metadata	View
102		20	Major Cities of Washington State	Major cities of Washington State, including every county seat, are depicted as point features.	x	x		Metadata	View
103		21	Major Lakes of Washington State	Selected major lakes and reservoirs of Washington State are depicted as polygons. Major reservoirs on the Columbia and Snake Rivers, and Lake Washington are excluded.	x	x		Metadata	View
104		22	Major Shorelines of Washington State	Major hydrography for Washington State represented as polygons. Features in this data set define the land extent of Washington state.	x	x		Metadata	View
105		23	Military Reservations of Washington State, at 1:24,000	Polygons depict Washington State's U.S. Military Reservations.	x	x		Metadata	View
106		24	Military Reservations of Washington State, at 1:500,000	United States military reservations are shown as polygons in this data set.	x	x		Metadata	View
107		25	National Forests of Washington State, at 1:24,000	Polygons depict National Forest lands in Washington State.	x	x		Metadata	View
108		26	National Forests of Washington State, at 1:500,000	United States Department of Agriculture Forest Service lands are shown as polygons in this data set. Each named forest is a discrete set of areas.	x	x		Metadata	View
109		27	National Parks of Washington State	Polygons depict National Parks in Washington State.	x	x		Metadata	View
110		28	National Recreation Areas of Washington State	Polygons depict National Recreation Areas in Washington State.	x	x		Metadata	View
111		29	National Scenic Areas of Washington State	Washington's one National Scenic Area--Columbia River Gorge National Scenic Area--is depicted as a single polygon in this data set.	x	x		Metadata	View
112		30	Noise Walls, Washington State Department of Transportation	Inventory of Washington State DOT noise barriers.	x	x		Metadata	View

2008 WA Significant Geospatial Data Sets

113	31	Northwest Region Potential Mitigation Opportunities, Washington State Department of Transportation	This shapefile represents approximate locations of potential partnering and/or mitigation sites for upcoming WSDOT NW Region projects. These sites have been provided by a variety of sources.		x		Metadata	View
114	32	Northwest Region Projects With Wetland Impacts, 2007-2014, Washington State Department of Transportation	This layer contains a point and line file that represents funded WSDOT projects that are likely to have wetland impacts. The list includes projects with ad dates between 2007 and 2014.		x		Metadata	View
115	33	Orthophotos, Statewide Orthophoto Program - 18" Ground Sample Distance, Full Color	This data includes full color digital orthophotos at 18" pixel resolution. To facilitate data use at WSDOT, the provided quarter township orthophotos have been compressed using Mr. Sid software. Raster catalogs and LYR files are available.		x		Metadata	View
116	34	Orthophotos, Washington State Department of Transportation Photogrammetry - with Index	Polygons depict the boundaries of orthophotos used by the Washington State Department of Transportation. This data set is an index to imagery files in the \gisosc\geodata\imagery\high_res and local_agency directories. The majority of these boundaries represent the geographic coverage of mosaicked Mr. Sid images produced by WSDOT's Photogrammetry Office.	x	x		Metadata	View
117	35	Outfall Inventoried State Route Se	Sections of state routes surveyed for I4 Stormwater Outfall Retrofit Inventory		x		Metadata	View
118	36	Outfall Retrofit Inventory, Current	Points in this dataset represent stormwater outfalls along Washington State Department of Transportation (WSDOT) state routes. An outfall is defined as any point where concentrated stormwater runoff leaves the WSDOT right-of-way, or where concentrated runoff enters a waterbody within the WSDOT right-of-way.		x		Metadata	View
119	37	Populated Places of Washington State	Points depict Washington State's populated places. This data reflects information provided by the US Geological Survey's Geographic Names Information System (GNIS), the National Institute of Standards and Technology's Federal Information Processing Stan	x	x		Metadata	View
120	38	Railroads Abandoned in Washington State, at 1:24,000	Railroads abandoned since 1953 in Washington state are shown as linear features. These represent abandoned rights of way, whether or not tracks currently exist and whether or not rights of way are currently owned by a railroad operator.	x	x		Metadata	View
121	39	Railroads Abandoned in Washington State, at 1:500,000	Railway rights-of-way abandoned since 1953 in Washington state are shown as lines. Trackage may or may not exist, and the right of way may or may not be currently owned by a railroad company.	x	x		Metadata	View
122	40	Railroads Active in Washington State, at 1:500,000	This data set is a linear depiction of railway mainline rights of way currently considered active by the Washington State Department of Transportation's Public Transportation and Rail Office.	x	x		Metadata	View
123	41	Railroads Active in Washington State, at 1:24,000	Actively operated railroads of Washington State depicted as linework. Principle routes are shown with selected sidings and yards. Selected bridges and tunnels are depicted cartographically.	x	x		Metadata	View
124	42	Regions of the Washington State Department of Transportation, at 1:24,000	Washington State Department of Transportation region boundaries depicted as polygons.	x	x		Metadata	View
125	43	Regions of the Washington State Department of Transportation, at 1:500,000	Washington State Department of Transportation's six region boundaries are depicted as polygons.	x	x		Metadata	View

2008 WA Significant Geospatial Data Sets

126		44	Roadside Feature Inventory Program	Washington State Department of Transportation statewide Roadside Features Inventory Program (RFIP) data layers. Beginning with GPS equipment, features found along State Highways within the clear zone are collected.		x		Metadata	View
127		45	Roadway Access Control, Washington State Department of Transportation Transportation Data Office	This data set contains access control information.		x		Metadata	View
128		46	Roadway Data, Washington State Department of Transportation Transportation Data Office	This dataset is a snapshot of the roadway system, effective 12/31/2007.	x	x		Metadata	View
129		47	Roadway Design Speed Vertical Curve, Washington State Department of Transportation, Transportation Data Office	The optimum speed for which a vertical curve is designed.	x	x		Metadata	View
130		48	Roadway Horizontal Curve Design Speed, Washington State Department of Transportation, Transportation Data Office	The optimum speed for which a horizontal curve is designed.	x	x		Metadata	View
131		49	RTPO - Regional Transportation Planning Organizations of Washington State	Polygons represent the Regional Transportation Planning Organizations (RTPOs). RTPOs are responsible for transportation planning, growth management compliance within their jurisdictions, and the development and adoption of regional transportation plans.	x	x		Metadata	View
132		50	Shaded Relief of Washington State	This monochromatic image file represents shaded relief of landforms of the state of Washington. Hill-shading is presented in shades of gray.	x	x		Metadata	View
133		51	Shaded Relief of Washington State, in Color	This georeferenced color image represents shaded relief of landforms of the state of Washington and was created by overlaying the Washington State Department of Natural Resources Shaded Relief of Washington on top of the United States Geological Survey's DEM.	x	x		Metadata	View
134		52	State Route GIS Road Log	An abbreviated version of the Washington State Department of Transportation publication "State Highway Log" in an electronic tabular format. Data includes road features, roadside features, and descriptions.	x	x		Metadata	View
135		53	State Route GPS Routes	A portion of Washington's State Routes created from a combination of Global Positioning System (GPS) data and inertial data are depicted as polylines with measures and State Route identifiers. The location of the lines corresponds to the leftmost general use name.	x	x		Metadata	View
136		54	State Route Intersections, Signalized	The intersections of two or more State Routes where Traffic Control is signalized (SG).	x	x		Metadata	View
137		55	State Route Milepost Markers of Washington State, Washington State Department of Transportation	This dataset contains two sources used to determine X, Y coordinates for positions along Washington State highways perpendicular to milepost markers. Locations were collected on the fly from a moving vehicle using Global Positioning Systems (GPS) technology.	x	x		Metadata	View
138		56	State Route Roadside Landscape Classifications of Washington	The State Routes of Washington are segmented according to the nominal roadside landscape classification determined by the Roadside Design Office of the Washington State Department of Transportation	x	x		Metadata	View

2008 WA Significant Geospatial Data Sets

139	57	State Route Roadside Special Maintenance Areas of Washington	GPS locations of environmentally sensitive areas that front state highways. Sensitive areas include waterbodies, wetlands, streams and channel migration zones. Line segments were generated with 300 foot buffers added.	x	x		Metadata	View
140	58	State Route Roadside Special Maintenance Areas, Northwest Region	The Northwest Region of the Washington State Department of Transportation maintains the features on state routes and right of way areas. This dataset contains spatially referenced data on wetlands as defined by Section 404 of the Clean Water Act.	x	x		Metadata	View
141	59	State Routes of Washington, at 1:24,000	Washington's State Routes are depicted as lines with State Route identifiers and route measure attributes. The individual county coverages in the Washington State County Series, State Routes were combined to create this statewide data set.	x	x		Metadata	View
142	60	State Routes of Washington, at 1:500,000	This data set is a linear representation of Washington State Routes, with State Route (SR) identifiers and route measure attributes. Each SR is symbolized with a single line whether or not the highway is divided.	x	x		Metadata	View
143	61	Stormwater Outfall Along Washington State Routes	Points represent stormwater outfalls along Washington State Department of Transportation state routes. The main areas of emphasis are: King, Pierce, Snohomish, Spokane, and Kitsap Counties, as well as parts of Thurston County.		x		Metadata	View
144	62	Survey Monuments of Washington, National Geodetic Survey HARN	The National Geodetic Survey (NGS) partnered with State agencies throughout the nation to assist in the development of a High Accuracy Reference Network (HARN) of survey stations (a.k.a. monuments).	x	x		Metadata	View
145	63	Survey Monuments of Washington, Washington State Department of Transportation	The Geodetic Survey Section within WSDOT Geographic Services has installed and maintains a majority of the primary (Geodetic) survey control used by the Department of Transportation in its ongoing construction and road maintenance programs.	x	x		Metadata	View
146	64	Traffic Counts, Washington State Department of Transportation Transportation Data Office	2007 Annual Average Daily Traffic figures for state highway traffic count locations monitored by WSDOT's Transportation Data Office.		x		Metadata	View
147	65	Traffic Sections 500k, Washington State Department of Transportation Transportation Data Office	A data set to provide 2007 traffic information along the state highway system. Data represents all directions of travel for the given location.		x		Metadata	View
148	66	Traffic Sections, Washington State Department of Transportation Transportation Data Office	This dataset provides traffic data for application to the modified, or full design level matrix in Chapters 430, or 440 of the Design Manual to establish the appropriate design class for the Design Elements of a project.		x		Metadata	View
149	67	Tribal Consultation Areas, Washington State Department of Transportation	This data set represents the areas in which tribes would like to be contacted for government-to-government consultation on WSDOT projects. This data set does NOT contain Usual and Accustomed Areas, and should not be referred to as such.		x		Metadata	View
150	68	Washington State Highways 2008-2009	The Official state Highway Map (tourist map) provides statewide driving directions for tourists or any person unfamiliar with a given area of the State. This map is distributed free of charge at State Welcome Centers and rest areas. Copies of the map are	x	x		Metadata	View
153	69	Wetland Mitigation Bank Sites, Washington State Department of Transportation	This data set contains points identifying locations of WSDOT wetland mitigation bank sites.		x		Metadata	View

2008 WA Significant Geospatial Data Sets

154		70	Wetland Monitoring Site Photo Points, Washington State Department of Transportation	This feature class contains photo points used by the Wetland Assessment and Monitoring Program at WSDOT wetland mitigation sites. October 2007.		x		Metadata	View
155		71	Wetland Monitoring Sites, Washington State Department of Transportation	This data set contains points identifying locations where WSDOT wetland mitigation projects are being monitored, or have been monitored, around the state.		x		Metadata	View
156		72	WSDOT and WSP Fuel Station Locations of Washington State	This data set depicts Washington State Department of Transportation (WSDOT) and Washington State Patrol (WSP) fueling stations.	x	x		Metadata	View
Dept. of Fish & Wildlife (DFW) - 2009									
157		1	Priority Habitats and Species (PHS) Polygons	This dataset consists of polygons that describe occurrences of habitats and species considered priority by WDFW.				Metadata	View
158		2	Priority Habitats and Species (PHS), Habitat Points	This dataset consists of priority habitat sites that cannot be represented as polygons in the PHS polygon database.				Metadata	View
159		3	Bald Eagle Regulatory Buffers	Regulatory buffers generated around known observations of Bald Eagles including nests and communal roosts				Metadata	View
160		4	Spotted Owl Status Buffers	This dataset contains regulatory buffers for Spotted owls. The buffers are classified based on the official status of the spotted owl site center.				Metadata	View
161		5	National Wetlands Inventory	This dataset identifies wetlands and deep water habitats as either polygons or linear features. The wetlands are classified within a hierarchical organization according to plants, soils, and frequency of flooding.				Metadata	View
162		6	Fish Passage Barrier Inventory	This dataset contains information on the location, physical characteristics and barrier status of man made fish ways, culverts and dams.				Metadata	View
163		7	Forage Fish	Survey and occurrence data related to distribution of sand lance and smelt.				Metadata	View
164		8	Salmon and Steelhead Habitat Inventory and Assessment Program (SSHAP)	This dataset contains information on a 1:24,000 scale stream network broken down into segments of like gradient.				Metadata	View
165		9	Klickitat County Oak	Oak canopy classification for Klickitat County.				Metadata	View
166		10	Shrubsteppe	Shrubsteppe habitat for eastern Washington.				Metadata	View
167		11	Old Growth	1986 mapping of forest stand type categories in western Washington				Metadata	View
168		12	Game Management Units	Boundaries used for big game hunt seasons				Metadata	View
169		13	Deer Units	Boundaries used for deer hunts				Metadata	View
170		14	Elk Units	Boundaries used for elk hunts				Metadata	View
171		15	Goat Units	Boundaries used for goat hunts				Metadata	View
172		16	Sheep Units	Boundaries used for bighorn sheep hunts.				Metadata	View
173		17	WDFW Ownership	This dataset contains general boundaries of lands that WDFW owns or manages.				Metadata	View
174		18	Water Access Sites	Water access sites managed by WDFW				Metadata	View
175		19	Sage Grouse Distribution	Current and historic sage grouse distribution for western states.				Metadata	View
176		20	Sharp-tailed Grouse Distribution	Current and historic sharp-tailed grouse distribution for western states.				Metadata	View
177		21	Road Management and Abandonment Planning	Inventory of road conditions on WDFW owned lands in compliance to the forest practices rules.				Metadata	View
178		22	Marine Bathymetry	This dataset contains information on measurements of the depth of large bodies of water in Puget Sound, Strait of Juan De Fuca and Washington marine coast.				Metadata	View
179		23	Tribal Ceded Areas	WDFW interpretation of tribal ceded area boundaries.				Metadata	View

2008 WA Significant Geospatial Data Sets

180		24	GAP	This dataset contains land cover information and modeled species distributions.				Metadata	View
181		25	Marbled Murrelets	This dataset contains information on marbled murrelet occupancy detection locations and areas.				Metadata	View
182		26	Spotted Owls	This dataset contains information on spotted owl site center locations and various associated polygon buffers.				Metadata	View
183		27	Seal/Sea Lion Haulout sites	Contains locations of seal and sea lion haulout sites in Washington waters.				Metadata	View
184		28	Seabird Colonies	Contains locations surveyed for breeding seabirds.				Metadata	View
185		29	Wildlife Survey Data Management(WSDM)	This dataset contains information on documented site observations of wildlife including state and federal listed species of concern.				Metadata	View
186		30	StreamNet	This dataset includes 1:100,000 scale streams with major lakes and double banked streams; fish presence with known spawning and rearing; locations of natural and artificial barriers to anadromous fish; and production facilities including hatcheries and off-site rearing and staging areas.				Metadata	View
187		31	Washington Lakes and Rivers Information System (WLRIS)	This dataset includes 1:24,000 scale streams and water bodies and fish presence with know spawning, rearing and stock status. It also includes presumed and potential presence based on habitat				Metadata	View
188		32	Marine Resources	This dataset is a collection of information concerning marine fish and shellfish resources in the coastal and inland marine waters of Washington.				Metadata	View

Dept. of Revenue (DOR) - 2009								
240	1	Cities	Incorporated Washington State Cities. Boundaries of incorporated municipalities of Washington State are depicted as polygons. This information was compiled from a variety of sources at the county and city level. City boundaries are updated continuously by staff at Department of Revenue as they are notified of new annexations and incorporations. This dataset is used as a reference layer for geographic information systems at the Washington State Department of Revenue and is used to identify business locations in relation to taxing jurisdictions.	x			Metadata	View
241	2	PTBA	Public Transportation Benefit Area. Public Transportation Benefit Areas (PTBA) and unincorporated Regional Transportation Areas (RTA) as polygons. RTA boundary data is provided by Sound Transit and aligned to Tele Atlas Dynamap 2000 street centerlines and other relevant DOR taxation boundaries. This dataset is used as a reference layer for geographic information systems at the Washington State Department of Revenue and is used in conjunction with other relevant taxing jurisdictions to determine appropriate tax liability based upon location.	x			Metadata	View

2008 WA Significant Geospatial Data Sets

242		3	RTA	Regional Transit Authority. Sound Transit / Regional Transit Authority (RTA) area and boundary in King, Pierce, and Snohomish Counties. Taxation district and service area for all the Sound Transit lines of business. Supports all Sound Transit GIS business mapping and analysis functions. Supports map display and query and general mapping agency-wide.	x			Metadata	View
243		4	CEZ	Community Empowerment Zone. Polygons depicting areas in Washington State eligible for tax exemptions to help stimulate growth. Updates are infrequent and occur as new areas are granted CEZ status.	x			Metadata	View
244		5	Indian	Washington State Indian Country boundaries resulting from DOR efforts to work with tribes to identify and verify tribal lands. The data is based upon both data collected from cooperating tribes and existing datasets collected from other government resources. Primarily used as a reference layer for geographic information systems at the Washington State Department of Revenue, it is used to identify appropriate tax liability or tax exemption per state tribal exemption laws. This data contains Washington State Indian Country boundary and attribute data bound by agreements made with tribal governments, it is not available for distribution.			x	Metadata	View
245		6	HZ	Haul Zones. Polygons depicting Haul Zone boundaries used by DOR Foresters to determine timber hauling tax liability based on established zones. Updates occur as needed.	x			Metadata	View
246		7	SVA	Stumpage Value Area. Polygons depicting Stumpage Value Area boundaries used by DOR Foresters to determine timber tax liability based on established "Value Area" zones. Updates occur as needed.	x			Metadata	View
247		8	Air	Airport Districts. Boundaries of Washington State Airport districts are depicted as polygons. The Airport Districts dataset is dissolved from the Department of Revenue Tax Code Area dataset on an annual basis. Department of Revenue staff maintain the TCA boundaries, editing the dataset when notified of new Airport District annexations or corrections by the County Assessor's offices.	x			Metadata	View
248		9	Apr	Apportionment Districts. Boundaries of Washington State Apportionment districts are depicted as polygons. The Apportionment District dataset is dissolved from the Department of Revenue Tax Code Area dataset on an annual basis. Department of Revenue staff maintain the TCA boundaries, editing the dataset when notified of new Apportionment District annexations or corrections by the County Assessor's offices.	x			Metadata	View
249		10	Cem	Cemetery Districts. Boundaries of Washington State Cemetery Districts depicted as polygons. The Cemetery District dataset is dissolved from the Department of Revenue Tax Code Area dataset on an annual basis. Department of Revenue staff maintain the TCA boundaries, editing the dataset when notified of new Cemetery District annexations or corrections by the County Assessor's offices.	x			Metadata	View
250		11	Clb	Capital Library Districts. Boundaries of Washington State Capital Library Districts depicted as polygons. The Capital Library Districts dataset is dissolved from the Department of Revenue Tax Code Area dataset on an annual basis. Department of Revenue staff maintains the TCA boundaries, editing the dataset when notified of new Capital Library District annexations or corrections by the County Assessor's offices.	x			Metadata	View

2008 WA Significant Geospatial Data Sets

251		12	Crd	County Road Districts. Boundaries of Washington State County Road Districts depicted as polygons. The County Road Districts dataset is dissolved from the Department of Revenue Tax Code Area dataset on an annual basis. Department of Revenue staff maintains the TCA boundaries, editing the dataset when notified of new County Road District annexations or corrections by the County Assessor's offices.	x				Metadata	View
252		13	Ems	Emergency Medical Services Districts. Boundaries of Washington State Emergency Medical Services Districts depicted as polygons. The Emergency Medical Services Districts dataset is dissolved from the Department of Revenue Tax Code Area dataset on an annual basis. Department of Revenue staff maintain the TCA boundaries, editing the dataset when notified of new Emergency Medical Services District annexations or corrections by the County Assessor's offices.	x				Metadata	View
253		14	Fir	Fire Districts. Boundaries of Washington State Fire Districts depicted as polygons. The Fire Districts dataset is dissolved from the Department of Revenue Tax Code Area dataset on an annual basis. Department of Revenue staff maintain the TCA boundaries, editing the dataset when notified of new Fire Districts district annexations or corrections by the County Assessor's offices.	x				Metadata	View
254		15	Fld	Flood Districts. Boundaries of Washington State Flood Districts depicted as polygons. The Flood Districts dataset is dissolved from the Department of Revenue Tax Code Area dataset on an annual basis. Department of Revenue staff maintains the TCA boundaries, editing the dataset when notified of new Flood District annexations or corrections by the County Assessor's offices.	x				Metadata	View
255		16	Fry	Ferry Districts. Boundaries of Washington State Ferry Districts depicted as polygons. The Ferry Districts dataset is dissolved from the Department of Revenue Tax Code Area dataset on an annual basis. Department of Revenue staff maintain the TCA boundaries, editing the dataset when notified of new Ferry District annexations or corrections by the County Assessor's offices.	x				Metadata	View
256		17	Fzn	Flood Zone Districts. Boundaries of Washington State <IFlood Zone Districts depicted as polygons. The Flood Zone Districts dataset is dissolved from the Department of Revenue Tax Code Area dataset on an annual basis. Department of Revenue staff maintain the TCA boundaries, editing the dataset when notified of new Flood Zone District annexations or corrections by the County Assessor's offices.	x				Metadata	View
257		18	Hsp	Hospital Districts. Boundaries of Washington State Hospital Districts depicted as polygons. The Hospital Districts dataset is dissolved from the Department of Revenue Tax Code Area dataset on an annual basis. Department of Revenue staff maintain the TCA boundaries, editing the dataset when notified of new Hospital District annexations or corrections by the County Assessor's offices.	x				Metadata	View
258		19	Lib	Library Districts. Boundaries of Washington State Library Districts depicted as polygons. The Library Districts dataset is dissolved from the Department of Revenue Tax Code Area dataset on an annual basis. Department of Revenue staff maintain the TCA boundaries, editing the dataset when notified of new Library District annexations or corrections by the County Assessor's offices.	x				Metadata	View

2008 WA Significant Geospatial Data Sets

259		20	Msq	Mosquito Districts. Boundaries of Washington State Mosquito Districts depicted as polygons. The Mosquito Districts dataset is dissolved from the Department of Revenue Tax Code Area dataset on an annual basis. Department of Revenue staff maintain the TCA boundaries, editing the dataset when notified of new Mosquito District annexations or corrections by the County Assessor's offices.	x				Metadata	View
260		21	Pkr	Parks and Recreation Districts. Boundaries of Washington State Parks and Recreation Districts depicted as polygons. The Parks and Recreation Districts dataset is dissolved from the Department of Revenue Tax Code Area dataset on an annual basis. Department of Revenue staff maintain the TCA boundaries, editing the dataset when notified of new Parks and Recreation District annexations or corrections by the County Assessor's offices.	x				Metadata	View
261		22	Prk	Park Districts. Boundaries of Washington State Park Districts depicted as polygons. The Park Districts dataset is dissolved from the Department of Revenue Tax Code Area dataset on an annual basis. Department of Revenue staff maintain the TCA boundaries, editing the dataset when notified of new Park District annexations or corrections by the County Assessor's offices.	x				Metadata	View
262		23	Prt	Port Districts. Boundaries of Washington State Port Districts depicted as polygons. The Port Districts dataset is dissolved from the Department of Revenue Tax Code Area dataset on an annual basis. Department of Revenue staff maintain the TCA boundaries, editing the dataset when notified of new Port District annexations or corrections by the County Assessor's offices.	x				Metadata	View
263		24	Pud	Public Utility Districts. Boundaries of Washington State Public Utility Districts depicted as polygons. The Public Utility Districts dataset is dissolved from the Department of Revenue Tax Code Area dataset on an annual basis. Department of Revenue staff maintain the TCA boundaries, editing the dataset when notified of new Public Utility District annexations or corrections by the County Assessor's offices.	x				Metadata	View
264		25	Rsv	Road Service Districts. Boundaries of Washington State Road Service Districts depicted as polygons. The Road Service Districts dataset is dissolved from the Department of Revenue Tax Code Area dataset on an annual basis. Department of Revenue staff maintain the TCA boundaries, editing the dataset when notified of new Road Service District annexations or corrections by the County Assessor's offices.	x				Metadata	View
265		26	Sch	School Districts. Boundaries of Washington State School Districts depicted as polygons. The School Districts dataset is dissolved from the Department of Revenue Tax Code Area dataset on an annual basis. Department of Revenue staff maintain the TCA boundaries, editing the dataset when notified of new School District annexations or corrections by the County Assessor's offices.	x				Metadata	View
266		27	Sew	Sewer Districts. Boundaries of Washington State Sewer Districts depicted as polygons. The Sewer Districts dataset is dissolved from the Department of Revenue Tax Code Area dataset on an annual basis. Department of Revenue staff maintain the TCA boundaries, editing the dataset when notified of new Sewer District annexations or corrections by the County Assessor's offices.	x				Metadata	View

2008 WA Significant Geospatial Data Sets

267		28	Tbd	Transportation Benefit Districts. Boundaries of Washington State Transportation Benefit Districts depicted as polygons. The Transportation Benefit Districts dataset is dissolved from the Department of Revenue Tax Code Area dataset on an annual basis. Department of Revenue staff maintain the TCA boundaries, editing the dataset when notified of new district annexations or corrections by the County Assessor's offices.	x			Metadata	View
268		29	Wat	Water Districts. Boundaries of Washington State Water Districts depicted as polygons. The Water Districts dataset is dissolved from the Department of Revenue Tax Code Area dataset on an annual basis. Department of Revenue staff maintain the TCA boundaries, editing the dataset when notified of new Water District annexations or corrections by the County Assessor's offices.	x			Metadata	View
269		30	Tca	Tax Code Areas. Boundaries of Washington State Tax Code Areas depicted as polygons. Department of Revenue staff maintain the TCA boundaries, editing the dataset when notified of new annexations or corrections by the County Assessor's offices.	x			Metadata	View
270		31	Ptcty	Property Tax City Jurisdiction boundaries. Boundaries of incorporated Washington State municipalities depicted as polygons. The Property Tax City Jurisdiction boundaries dataset is dissolved from the Department of Revenue Tax Code Area dataset on an annual basis. Department of Revenue staff maintain the TCA boundaries, editing the dataset when notified of new City Jurisdiction boundary annexations or corrections by the various municipalities or County Assessor's offices.	x			Metadata	View
271		32	Loccodes	Location Codes. Washington State tax location code areas depicted as polygons. Data is derived through a union of select Washington State tax jurisdiction boundary spatial data and is used to support DOR public and internal map services for location code determination via spatial query. This data contains Washington State Indian Country boundary and attribute data bound by agreements made with tribal governments, it is not available for distribution.			x	Metadata	View
Dept. of Natural Resources (DNR) - 2009									
272		1	CADASTRE_GDB (Cadastral Geodatabase)	The Cadastre geodatabase includes information about the geographic extent of rights and interests in real property. The purpose of this geodatabase is to meet the agency's (WADNR) needs for land surveying, land title, and land management GIS data. Components of this geodatabase include; point, boundary, parcel (upland and aquatic), legal description, and jurisdictional boundaries.	x			Metadata	View
273		2	DEM10 Layers (Digital Elevation Model-10 meter)	The DEM10 layers include; DEM10W, DEM10E, DEM10ORE, and DEM10IDA. They are a group of four ARC/INFO GRID (raster) coverages depicting surface elevation. Collectively, these coverages provide statewide (and beyond) DEM data coverage. The data was derived from USGS 10-meter DEMs. All source data was scanned from the hypsography (contour) separate used in the publication of USGS 7.5 minute quadrangles, and is classified as LEVEL 2 DEM.	x			Metadata	View

2008 WA Significant Geospatial Data Sets

274	3	DEM30 (Digital Elevation Model-30meter)	DEM30 is a statewide ARC/INFO GRID (raster) coverage depicting surface elevation. It was derived by resampling USGS 10-meter DEMS (Digital Elevation Models).	x			Metadata	View
275	4	DEM90 (Digital Elevation Model-90 meter)	DEM90 is a statewide ARC/INFO GRID (raster) coverage depicting surface elevation. It was derived by resampling the DEM10 data layer.	x			Metadata	View
276	5	3' DIGITAL ORTHOPHOTOS	This data is statewide, black and white, digital orthophotography at 3 foot pixel resolution. This data is not available online to WADNR users. It is available via CD.		x		Metadata	View
277	6	8' DIGITAL ORTHOPHOTOS	This data is statewide, black and white, digital orthophotography at 8 foot pixel resolution. This data is available online to WADNR users.		x		Metadata	View
278	7	FMU (Forest Management Units)	This coverage is specific to WADNR forestry management business. Forest Management Units (FMU) are contiguous pieces of ground that have a prescribed set of objectives to be accomplished or fulfilled.			x	Metadata	View
279	8	FP (Forest Practices)	The Forest Practices dataset is information that is input from forest practices applications and associated geographic/environmental data.	x			Metadata	View
280	9	FPWET (Forest Practices Wetlands)	This dataset was derived from the National Wetlands Inventory and includes wetland polygons coded with the most appropriate forest practices wetlands classification. This dataset was created for use in implementing the Washington Forest Practices Rules (see WAC 222).	x			Metadata	View
281	10	GEOLOGY (1:24,000 scale)	The Geology data shows surface geology including rock type, faults, folds, structure, and point sample locations by 7.5 minute quad.	x			Metadata	View
282	11	GEOLOGIC HAZARD INFORMATION	The Geologic Hazard data includes both tsunami inundation and liquefaction susceptibility information. The tsunami inundation data show areas expected to be inundated by specific scenarios described in each dataset. The liquefaction susceptibility shows relative susceptibility to ground-shaking-induced liquefaction for two specified levels of ground shaking.	x			Metadata	View
283	12	HAZONE (Hazard Zones)	Hazard Zones is a polygon coverage with landform and landslide hazard rating information. This coverage also includes source document information.	x			Metadata	View
284	13	HYDRO (Hydrography)	The Hydrography data includes data on water bodies (open waters, lakes, etc.) and watercourses (rivers, streams, canals, etc.) in Washington State.	x			Metadata	View
285	14	IFPL SHUTDOWN (Industrial Fire Precaution Level Shutdown Zones)	This geodataset is used to administer fire danger on all industrial operations in the State of Washington during the fire season. It is maintained by WADNR Region personnel.	x			Metadata	View
286	15	LSI (Landslide Inventory)	Landslide Inventory is a polygon/arc coverage that is an inventory of landside events and related information.	x			Metadata	View
287	16	LULC (Land Use/Land Cover)	The Land Use code describes the agency (WADNR) designated use of a given WADNR land parcel and is stored in the (almost retired) LULC data. The Land Use code is the only remaining functional part of the LULC data.	x			Metadata	View
288	17	NDMPL (Non-WADNR Major Public Lands)	The Non-WADNR Major Public Lands data (NDMPL) contains ownership parcels for Federal, State (excluding WADNR), County and City lands within the State of Washington. It also includes Tribal administrative boundaries.				Metadata	View
289	18	RIU_CURRENT (Resource Inventory Units Current)	This geodataset includes grown and updated forest inventory and other land cover on DNR managed lands.			x	Metadata	View

2008 WA Significant Geospatial Data Sets

290	19	ROS (Rain-On-Snow Zones)	The Rain-On-Snow Zone (ROS) data is based on average amounts of snow on the ground in early January, relative to the amount that could reasonably be melted during a model storm event. Five snow zones (based on climate, elevation, latitude and vegetation) are defined for the State of Washington. This dataset was created for use in implementing the Washington Forest Practices Rules (see WAC 222).	x			Metadata	View
291	20	SHOREZONE INVENTORY	The ShoreZone Inventory is a statewide inventory of shoreline habitat completed by the Nearshore Habitat Program at WADNR. The ShoreZone Inventory describes the physical and biological characteristics of intertidal and shallow subtidal areas.	x			Metadata	View
292	21	SITECLASS	The Site Class dataset is derived from the WADNR Soils layer and was created for use in implementing the Washington Forest Practices Rules associated with riparian management zones (see WAC 222-30-021 and 222-30-022).	x			Metadata	View
293	22	SITKAZONE (Sitka Spruce Zone)	The Sitka Spruce Zone boundary layer defines the area considered to be within the Western Washington coastal zone for the purposes of implementing the Washington Forest Practices Rules (see WAC 222-16-030). This zone corresponds to the coastal fog zone as depicted in Franklin and Dyrness, 1973.	x			Metadata	View
294	23	SKAGIT COUNTY INTERTIDAL HABITAT INVENTORY	The Skagit County Intertidal Habitat Inventory contains habitat inventory information collected by the Nearshore Habitat Program in WADNR during the summer of 1996 and 1997 along approximately 230 miles of shoreline in the Skagit County area. It is part of an ongoing effort to monitor the Puget Sound Nearshore environment through the Puget Sound Ambient Monitoring Program.	x			Metadata	View
295	24	SLPSTB (Modeled Slope Stability Screen)	This is a predictive data layer of shallow-rapid slope stability using one or more calibrated GIS-based models. This grid covers all forested watersheds of western Washington and portions of eastern Washington. It is intended to be an initial screen for determining shallow-rapid slope stability. Its intended use is for pre-classification screening of forest practices applications and screening for slope stability concerns on managed timberlands.	x			Metadata	View
296	25	SOILS	The Soils data was derived from the Private Forest Land Grading System (PFLG) and subsequent soil surveys. PLFG was a five-year, cooperative mapping program completed in 1980 for the purpose of forestland taxation. The Soils data covers (in whole or in part) approximately 1100 townships within the State of Washington.	x			Metadata	View
297	26	SOSEA (Spotted Owl Special Emphasis Areas)	This dataset includes Spotted Owl Special Emphasis Area polygons depicting the geographic areas and their associated spotted owl habitat goals as defined in the Washington Forest Practices Rules (see WAC 222-16-086).	x			Metadata	View
298	27	STRMTEMP (Stream Temperature Class)	The Stream Temperature Class data was jointly developed by WADNR and Department of Ecology and is used for Washington Forest Practices Rules compliance (WAC 222). It is a polygon coverage of surface water temperature standards as defined by WAC 173-201A. It does not contain information on actual surface water temperatures.	x			Metadata	View
299	28	TRANS (Transportation)	The Transportation data represents road, railroad, and other land and water routes existing within the State of Washington.	x			Metadata	View

2008 WA Significant Geospatial Data Sets

300	29	WAU (Watershed Administrative Units)	The Watershed Administrative Unit (WAU) dataset defines watershed administrative unit boundaries for use in watershed analysis as described in the Washington Forest Practices Rules (see WAC 222-22-020). The WAU boundaries cover the entire state of Washington and represent the boundaries of approximately 850 watersheds.	x			Metadata	View
301	30	WHATCOM COUNTY INTERTIDAL HABITAT INVENTORY	The Whatcom County Intertidal Habitat Inventory contains habitat inventory information collected by the Nearshore Habitat Program in WADNR during the summer of 1995 along approximately 110 miles of shoreline in the Whatcom County area. It is part of an ongoing effort to monitor the Puget Sound Nearshore environment through the Puget Sound Ambient Monitoring Program.	x			Metadata	View
302	31	WNHP (Washington Natural Heritage Program)	This geodataset includes information on rare plants and high-quality ecological communities. It represents the results of an ongoing and incomplete survey within the State of Washington. It is licensed to users for use in environmental assessment or proprietary land management.			x	Metadata	View
303	32	WNHP_DNR (Washington Natural Heritage Program - DNR)	This geodataset includes information on rare plants and high-quality ecological communities. It represents the results of ongoing and incomplete survey within the State of Washington. It is intended for use within the WADNR.			x	Metadata	View
304	33	Aquatic Lands Navigable Waters		x			Metadata	View
305	34	Aquatic Lands Ownership		x			Metadata	View
306	35	Bridges on DNR Manged Lands	Data consist of road bridges on DNR managed lands. Data was originally collected in 2000, and since then it has been updated as needed by the regions. Basic physically properties of bridges (i.e. deck and stringer material) along with the condition of the bridge is contained in the data.	x			Metadata	View
307	36	City Limits					Metadata	View
308	37	CONTOUR40 - Elevation contours at 40' intervals for Washington State	The CONTOUR40 SDE layer is 40' contours for the State of Washington derived from the DEM10E, DEM10W, DEM10ORE, and DEM10IDA data. Due to some limitations, the state had to be divided into ten areas (using blocks as township to delineate them). Using GRID functions, 40' contours were generated for these ten areas. The ten separate contour layers were then loaded into SDE to create a statewide contour layer. Processing this way has created some edge matching issues. There are contour gaps in the 100' (+) range in the areas where the "building blocks" join together.	x			Metadata	View
309	38	Culverts On DNR Managed Lands	This dataset was developed to assist in the management of forest lands as it relates to culverts in a defined channel.	x			Metadata	View
310	39	Desired Future Condition					Metadata	View
311	40	Fire Protection Districts	Washington State's County Fire Protection districts and municipal fire Departments.	x			Metadata	View
312	41	Fire Regime		x			Metadata	View

2008 WA Significant Geospatial Data Sets

313		42	Industrial Fire Precaution Shutdown Zones	Washington State Industrial Fire Precaution Level (IFPL) shutdown zones. This data delineates the forest fire shutdown zones, statewide. These zones were developed from information on average rainfall, and similar vegetation type. A fire precaution level is issued for each zone daily during fire season based on actual weather and the existing fire damage. By law, the Washington Department of Natural Resources (DNR) uses two closure systems for reducing the risk of wildfires on 12 million acres of private and state forest land that receives fire protection from the DNR. Activated when needed during the summer fire season, one closure system applies to woods workers and other forest industrial users. The other set of protections is aimed at the general public, but also includes local residents, landowners, recreationists and forest workers. Woods workers are required to observe both sets of restrictions as fire danger dictates. Other land users only need to follow the public use restrictions. Industrial Precautions The DNR, US Forest Service, Bureau of Land Management, and Bureau of Indian Affairs all use the same four-level industrial regulation system. This system, which helps prevent wildfires by regulating work in the woods, is known	x				Metadata	View
314		43	Fish Barriers						Metadata	View
315		44	Fish Distribution						Metadata	View
316		45	Forest Resource Inventory	Forest Resource Inventory for DNR managed lands.			x		Metadata	View
317		46	Gates to Washington DNR Managed Lands	This data set was developed to assist in the management of forest lands as it relates to gates and road access.	x				Metadata	View
318		47	Habitat Conservation Plan - Planning Units	This layer shows the boundaries of the 9 Habitat Conservation Plan (HCP) Planning Units (PU): Olympic Experimental State Forest, South Coast, North Puget, Columbia, Straits, South Puget, Chelan, Yakima, and Klickitat. They are grouped in three categories based on the differences in the adopted conservation strategies for northern spotted owl: Olympic Experimental State Forest, five Westside PU (South Coast, North Puget, Columbia, Straits, and South Puget,) and three eastside PU (Chelan, Yakima, and Klickitat). The baseline layer HCPUNIT97 was created in 1997 and is located at /database/covers/baseline/hcupunit97. The current layer displays the change in the boundary between Klickitat and Yakima PU as agreed in the HCP Amendment #1 (April, 2004) and the change between the OESF and Straits PU (March 2005).	x				Metadata	View
319		48	DNR Landscape Planning Areas	The Landscape spatial data consists of broad geographic areas used in forest planning per the Forest Resource Plan. The landscape plan boundary lines are defined first by natural watershed boundaries, using Watershed Administrative Units (WAU) as the basic building block, and then adjusted to include other geographic areas necessary for making resource management decisions. The area includes all lands, whether DNR-managed or not. However, the landscape assessment or landscape plan decisions only apply to the DNR-managed state trust lands. The data steward for this data has determined that the attribute information except for the landscape planning area name (LPU_NM) is out of date and should not be used.	x				Metadata	View
320		49	Landslide Hazard Zones	The Hazone coverage is a compilation of all known landslide hazard zones (also known as mass wasting map units) in the state of Washington. These have been compiled from previously existing watershed analyses, public, tribal, and private assessments, as well as incorporating data from the landslide hazard zonation project (LHZ), as these LHZ assessments become available. It has one related table Haz_Src_dat, related by the item Haz_src_id.	x				Metadata	View

2008 WA Significant Geospatial Data Sets

321		50	Landslide Inventory	Landslide feature data for know landslides in Washington State.	x			Metadata	View
322		51	Lidar					Metadata	View
323		52	Marbeled Murrelet Habitat	This layer contains marbled murrelet areas of concern for DNR-managed lands. It contains marbled murrelet occupied sites that are on or adjacent to DNR-managed lands. It contains marbled murrelet "reclassified" habitat for the Straits, South Coast, Columbia, and North Puget Sound HCP planning units. For the North Puget Sound planning unit, the layer contains "reclassified-plus" habitat. For the South Coast and Columbia planning units, it also contains areas of "extra deferral." For the Straits planning unit, it contains areas of release of reclassified habitat (see DNR HCP Substitution Agreement for the Marbled Murrelet, dated December 15, 2003).			x	Metadata	View
324		53	Washington State ShoreZone Inventory linear unit features	The overall ShoreZone Inventory dataset is an inventory of Washington State's saltwater shorelines conducted between 1994 and 2000 using the ShoreZone Mapping System. Physical and biological resources are described, along with information on the inventory data collection. The majority of the ShoreZone spatial data is line data, with some polygons and points. The inventory divides the shoreline into homogenous physical segments, the average linear segment length is 0.5 miles (0.8 km). Each spatial unit record has many corresponding tabular across-shore component records that describe the unit in more detail.	x			Metadata	View
325		54	Non-DNR Major Public Lands	The NDMPL (Washington State Non-Department of Natural Resources Major Public Lands) data contains ownership parcels for Federal, State (excluding WA DNR), County and City lands within the State of Washington. It also includes Tribal administrative boundaries. The NDMPL data layer is a polygon coverage and does not contain arc attribute information for ownership boundaries. This data is not connected to WA DNR's Cadastre layers or to the POCA layer (these data include WADNR ownership, Public Land Survey System and other cadastral data). So, as updates are made to POCA and Cadastre layers, they are not reflected in NDMPL.	x			Metadata	View
326		55	Northern Spotted Owl	We have a dozen features about the Norther spotted Owl in Washington State - Site centers, Reproductive sites, Nest patches, Nest sites, Nesting Roosting, Foraging and dispersal management ares, next best habitat, Special emphasis areas, buffered territorits.	x		x	Metadata	View
327		56	Orthophoto - Raster			x	x	Metadata	View
328		57	Parks	This data includes urban, state, and national parks as extracted from a Tele Atlas commercial, licensed product called StreetNet Connect Databases. This data is not available for download/distribution other than through Tele Atlas.				Metadata	View
329		58	Radio Towers	This data includes radio towers (point data) within Washington State as extracted from a version of USGS GNIS (Geographic Names Information System) source data.		x		Metadata	View
330		59	Rain-on-Snow	ROS is a statewide coverage of rain-on-snow zones. Rain-on-snow zones are based on average amounts of snow on the ground in early January, relative to the amount of snow that could reasonably be melted during a model storm event. Five ROS zones are defined in Washington State and are based on climate, elevation, latitude, and vegetation. ROS was digitized from 1:250,000 USGS quads. The Rain-on-snow coverage was created as a screening tool to identify forest practice applications that may be in a significant rain-on-snow zone (WAC 222-22-100).	x			Metadata	View

2008 WA Significant Geospatial Data Sets

331		60	Rock Pits	This data set was developed to assist in the management of forest lands as it relates to rock pits. Points were established from ortho photos or recreation grade GPS units.			x	Metadata	View
332		61	schools					Metadata	View
333		62	Slope Aspect	This data layer was derived from the DEM30 (Digital Elevation Model - 30 Meter) elevation data and portrays aspect of the terrain within the State of Washington.	x			Metadata	View
334		63	Sustainable Harvest					Metadata	View
335		64	USGS Map Boundary					Metadata	View
336		65	Utilities	The Utilities data contains arcs for powerlines, pipelines, substations, powerstations, and hydroelectric plants. The source data was created by gathering data from the USGS Digital Line Graphs (DLGs are digital vector representations of cartographic information derived from USGS maps and related sources), or digitizing necessary arcs from other source information.	?		? Dept. of Commerce (COM) - 2009									
340	1	Urban Growth Areas Map	One of the first steps in the implementation of the Growth Management Act (GMA) is for counties and their cities to designate urban growth areas (UGAs), "within which urban growth shall be encouraged, and outside of which growth can occur only if it is not urban in nature." RCW 36.70A.110 and WAC 365-195-335 provide clear criteria for designating urban growth boundaries around a city or a group of cities. Using the Dept of Ecology produced current UGA boundary data the Dept. of Commerce has in over the last year assisted them in tracking changes, based on the RCW requirement that all changes be sent to Commerce within 10 days of adoption by a county. We essentially repackage the map and add adoption dates and enacting ordinances to the metadata. This PDF map is available on our website, http://www.commerce.wa.gov/site/402/default.aspx and upon request we will send the ArcGIS shape files by email. The map is updated whenever a new boundary is adopted, which has been multiple times each year.	x				Metadata	View

Significant geo-datasets meet one or more of the following criteria:										
1. geodata set is mission critical for agency or major program or is required for regulatory purposes and/or,										
2. estimated or expected life cycle costs or investment exceed \$500,000 and/or,										
3. geodata is regularly distributed outside agency and/or,										
4. geodata holding has been designated significant by Information Services Board.
